This assignment takes in user input for a file to be copied as well also prompting them for the new copied file name. The program then copies the content from file A and creates file B with that content. If file A does not exist, the program will exit with an error message. If file B already exists, it will also exist with an error message.

```
EYeung@EricMac test % gcc Assignment\ 1.c -o a1
EYeung@EricMac test % ./a1
Source file: a.txt
Destination file: b.txt
File has been copied.
EYeung@EricMac test %
```
